The Electroizing Corporation of Ohio Is One of the Top 50 Finishing Shops

Products Finishing Magazine Names The Electroizing Corporation of Ohio to the "Top Shops" List

CINCINNATI, Ohio - The Electroizing Corporation of Ohio has been named one of the best finishing shops in the U.S., according to an industry benchmarking survey conducted by *Products Finishing* magazine. This trade publication has covered the industry since 1938.

The magazine conducted an extensive benchmarking survey that analyzed a company in several different areas, including Current Finishing Technology, Finishing Practices and Performances, Business Strategies and Performances, and Training and Human Resources.

Only the top 50 shops were given the honor of being a *Products Finishing* magazine 'Top Shop' based on a scoring matrix of those four criteria.

"The Electroizing Corporation of Ohio has established itself as one of the best finishing operations in the industry," said Tim Pennington, editor of *Products Finishing* magazine. "Our criteria were very stringent, and only the finishing shops that excelled in all four areas made the list. The Electroizing Corporation of Ohio is in rare air when it comes to finishing operations."

The Electroizing Corporation of Ohio offers validated metal coatings and surface finishing processes including Medcoat 2000 biocompatible thin dense chromium, Electroizing, hard chrome plating, aluminum anodizing, titanium anodizing, electropolishing, and passivation.

"We are extremely excited and pleased to be named one of *Products Finishing* magazine's 'Top Shops'," said Bill Loucks, general manager of The Electroizing Corporation of Ohio. "Our employees and management team have worked very hard to be the best in the industry, and to provide our customers with quality service."
